

Saturday, April 10 in Boonville, 9am to 4pm

“Between the Twines”

A one day **equine nutrition clinic** for horse owners and professionals by **Sally Hugg**

Topics covered:

Basic equine digestion and how it works

Slow feeding for a healthy digestive system and a happier horse

Nutrition 101 for horses: protein, fats, carbohydrates, minerals, and vitamins

Feeding for hoof health

Insulin resistance – is your horse at risk?

Hay and the nutrition it provides – it’s not just roughage

How to test hay or get information about the hay in your area

Using the NRC “Nutrient Requirements of Horses” guidelines

Weights, measures, and math – it’s easy!

Formulating a ration that’s simple and cost effective

How to decipher a feed tag and supplement label

Smart shopping – getting the best deals for your money

A 15 page handout, including a list of resources, will be provided. Participants are encouraged to bring feed and supplement labels from any products they are using. A hay corer and test sample kits are available before the workshop for those who would like to test their hay.

Cost : \$55
